PROFESSIONAL SUMMARY

Dynamic Full Stack Developer and IT Support professional with a strong foundation in web development and a passion for creating innovative solutions. Eager to leverage expertise in both front-end and back-end technologies to contribute to a collaborative, high-performance team environment.

WORK EXPERIENCE

Full Stack Developer / IT Support — Erick Trading Company

Aug 2025 — Present | Sharjah, UAE

- **System Architecture & Full-Stack Development:** Designed, architected, and developed scalable internal systems, including a custom multi-branch Cloud POS platform and an automated logistics driver scheduling and dispatch system to optimize operational tracking and delivery workflows.
- **AI-Driven Workflow Optimization:** Strategically integrated AI-assisted tools into the development lifecycle, accelerating software delivery timelines, automating repetitive tasks, and significantly increasing engineering output to efficiently manage high-volume workloads.
- **Multi-Branch IT Infrastructure Management:** Maintained oversight and provided comprehensive IT infrastructure support for 45 decentralized salon branches, ensuring maximum uptime for POS systems, hardware, and local network configurations.
- **Technical Operations & Troubleshooting:** Installed, configured, and troubleshot critical branch hardware (including thermal printers, barcode scanners, and network devices) alongside remote and on-site support to minimize operational downtime.
- **Business Alignment & Custom Solutions:** Collaborated closely with management and cross-functional teams to translate complex business requirements into tailored software solutions, enhancing branch efficiency and customer service.
- **System Maintenance & Documentation:** Formulated comprehensive system designs, technical documentation, and performance monitoring protocols to guarantee stable daily operations and future architectural scalability.

Web Developer Intern — Virtual Bears

Feb 2025 — May 2025 | Batangas, Philippines

- Contributed to front-end development using HTML, CSS, JavaScript, and WordPress to build and maintain client-based websites.
- Designed responsive interfaces ensuring seamless cross-browser compatibility and optimal user experience (UI/UX).
- Gained hands-on experience in website deployment, collaborative Git workflows, and technical problem-solving to deliver high-quality outputs within project deadlines.

SKILLS & TECHNOLOGIES

- React.js & Next.js
- MySQL & Database Design
- Software Architecture
- IT Infrastructure & Network
- Nest.js & Node.js
- API Development (RESTful)
- Object-Oriented Programming
- Problem-Solving & Debugging
- Laravel & PHP
- Version Control (Git)
- Agile & Scrum Methodologies
- Cross-Functional Collaboration

EDUCATION

BS in Information Technology — Lemery Colleges

Aug 2021 — Jun 2025 | Lemery, Batangas, Philippines
